Text Ads

As a basic rule, use clear, descriptive, and specific words that highlight the differentiating characteristics of your product/service. You can distinguish your ad by including your company name, line of business, or by highlighting one specific product. If you offer a local service or product, you might want to indicate your location in your ad.

We find the best way to differentiate your ad from others is to use specifics about your
company that make you different from the competition such as “guaranteed delivery in 48 hours;” or “we will beat competitors pricing by 10%.” People can be skeptical about ads but advertising always works if you answer the question, “why should I buy from you?”
